"MAYOR'S OFFICE, SAN FRANCISCO, July 15, 1929.

Honorable Board of Park Commissioners,
City and County of San Francisco.
Gentlemen:

"A discussion has arisen in the community regarding traffic conditions under your jurisdiction over the Great Esplanade at the Ocean Beach.

"As your Honorable Board has not as yet given expression to what its policy is to be, will you kindly do me the honor of advising me just what your Honorable Board intends to adopt as its traffic policy along the Esplanade.

"The discussion which has arisen evidences the keen interest the people of San Francisco take in their new Highway, second to none in all the world, and I am sure that the discussion can only be of friendly assistance to your Honorable Board in making up its traffic plans."
(Signed) JAMES ROLPH, JR., MAYOR.

After discussion, the following reply was drafted and forwarded to Mayor Rolph:

"July 16, 1929.

"Hon. James Rolph, Jr.,
Mayor of San Francisco,
City Hall.

"Dear Mayor Rolph:

"We have your letter of yesterday regarding traffic conditions on the Great Highway and inviting the Board of Park Commissioners to disclose to you the policy it intends to adopt to limit lateral approaches to this boulevard.

"The discussion mentioned in your letter is based on a misconception. No additional traffic entrances have been opened to the Great Highway. The present entrances are located at Noreiga, Kirkham, Rivera and Ulloa Streets. For many years before the improvement of this boulevard there were four such approaches, two of which had been constructed at the expense of adjoining property owners pursuant to permits issued by a former Board of Park Commissioners. Other citizens resident in the Sunset District urged the Commissioners to construct approaches to the Boulevard at points where the entrances existed prior to its improvement.

"In these circumstances the Commissioners invited the judgment of the San Francisco Traffic Survey Committee and of the Traffic Squad of the San Francisco Police Department on the wisdom and advisability of maintaining any lateral traffic entrances to the boulevard. After careful study their representatives recommended that connecting roadways should be constructed if they are required by the demands of traffic, adding that diagonal approaches by an easy grade to the boulevard would not create a serious hazard if 'left turns' were prohibited and regulations were adopted requiring traffic to come to a full stop immediately before entering the traffic lanes. As part of the same report they advised the Board of Park Commissioners that traffic entrances to the south-bound lane could be made by tunneling the highway and constructing approaches similar to those recommended for the north-bound traffic lane, and added that if they were used under regulations similar to those recommended for the north-bound traffic, no serious hazard would be created. However, the traffic experts reported that they did not believe the demands of traffic required any lateral approaches or entrances at the present time. As there was a difference of opinion on this point, the Board of Park Commissioners decided to maintain the present entrances temporarily, at the same

time properly safeguarding the public, so that experience might demonstrate if there were any necessity for such entrances.

"Before the motorists were permitted to use the four entrances, as they exist at the present time, some motorists motored from the boulevard over the lawns to the lower roadway, injuring the lawns and menacing the citizens, When the lower roadway, which is greatly in need of repair, is improved, such incidents may not be repeated, but until then, if the present entrances are closed, we may expect repetitions of these occurrences.

"Beginning with the month of February of the current year, the Park Commissioners have frequently sought the advice of Captain Charles Goff of the Traffic Squad of the San Francisco Police Department and of Mr. Ralph W. Robinson, Secretary of the San Francisco Traffic Survey Committee, on this matter, and even at the present time this problem is the subject of many conferences with them. The Park Commissioners, aided by the advice of these traffic experts, expect to reach a decision before the end of the present week on the number, if any, of lateral approaches to the Great Highway which should be maintained. If it is decided that the demands of traffic require any such entrances, no more than are absolutely necessary will be opened, and, if opened their use will be regulated so that traffic hazards will be minimized, if not entirely eliminated. In this and in all other matters under the jurisdiction of the Park Commissioners they are guided by a desire to have all public roads easily accessible to the citizens, if this may be done without creating an undue hazard.

"We are pleased to note from your letter that this question has created great public interest, as in our judgment a full and free discussion of any public question is the best aid to a correct decision. However, it is most deplorable that the citizens have been erroneously informed that the Board of Park Commissioners, influenced by private interests, had opened new roads to beach resorts. No new road to any resort has been opened, and the Park Commissioners are guided in their decision only by their desire to serve faithfully the best interests of all the citizens of this community.

"Assuring you that we will welcome any suggestion you may offer, we are,"

(Signed) BOARD OF PARK COMMISSIONERS OF THE CITY AND COUNTY OF SAN FRANCISCO,
BY B.P. LAMB, SECRETARY."
